Research shows training is far more effective when combined with coaching.

87% TRAINING INVESTMENTS LOST

Xerox Corporation carried out several studies on coaching. They determined that in the absence of follow-up coaching to their training classes, 87% of the skills change brought about by the program was lost. That's 87 cents in the skills dollar. However good your skills training in the classroom, unless it's followed up on the job, most of its effectiveness is lost without follow-up coaching.
